

Employment Opportunity

Architectural Engineer

SPECIALIZING IN BUILDING ENVELOPE EVALUATIONS

BC&E, LLC is an architectural and engineering firm specializing in the evaluation and design of repairs for building envelope, construction materials, and structural problems in buildings and other structures. We are seeking additional staff as we expand our current offices and develop business and offices in other cities.

Established in 2004, BC&E's services have primarily included the investigation and evaluation of existing buildings and structures, the design of repairs, and construction observation and administration services. BC&E has since expanded to include offices near Denver and Los Angeles to better serve clients locally and nationwide. BC&E is looking for qualified, self-motivated architects or architectural engineers with a passion for solving challenging building problems. Our work is focused on providing exceptional value to our clients by performing investigations by knowledgeable and experienced staff, developing detailed guidance and repair details based on field investigations, and services during construction.

BC&E, LLC is seeking an architect or engineer with a desire to develop specialized expertise in evaluating building envelope issues in existing buildings and structures. This is a unique, career-advancing opportunity for the qualified candidate who strives for technical excellence and attention to detail, exercises a professional demeanor, and possesses an entrepreneurial spirit. The successful candidate will participate in project work and business activities in our Littleton, Colorado or Santa Ana, California offices, including a mix of office and field work with some travel.

SPECIFIC REQUIREMENTS:

- Architects must have B. Arch or M.S. in Architecture, NCARB certification, and be a Licensed Architect in Colorado or California (or ability to receive reciprocity)
- Engineers must have B.S. in Engineering and be a Professional Engineer in Colorado or California (or ability to receive reciprocity)
- Proven skill to manage multiple projects simultaneously and coordinate work activities with positive, enthusiastic attitude
- Entrepreneurial spirit with the ability and desire to develop business opportunities and cultivate client base
- Minimum 5 years diverse experience in architectural engineering practice, including design development, construction observation, and construction administration
- Excellent interpersonal, verbal, and written communication skills
- Proficient in Microsoft Office and working knowledge of AutoCAD
- Demonstrated capability to effectively work as a dependable, self-motivated problem-solver and a collaborative team player

BC&E, LLC offers a competitive salary with performance-based bonuses, paid medical and disability insurance plans, 401(k) plan with company match, holiday, sick time, and vacation benefits.

Qualified applicants should submit a cover letter and complete resume in a single .pdf document to Mr. Christopher Dunbar, P.E., Denver Branch Manager at Recruiting@BCE-LLC.net.
